When and how will we hear about the results of testing?

Results from Miriumus are subject to lab turnaround time, but generally are expected within 24-48 hours.

If there are no positive results from the pooled testing group, your division will be notified. Students and employees in cleared, “COVID-19 Not Detected” pools will not receive individual communications.

If there is a positive result, a member of our Contact Tracing Team will reach out to any individuals identified in a potentially positive pair to sign a consent with Mirimus to individually test your sample as a single. The consent that Gateway currently is asking is for pooled testing. A doctor from Mirimus will reach out to you with final results.

Any additional individuals identified through the contact tracing process will also be contacted. Any changes required to campus operations will be communicated promptly.
