

Funding the Difference

We are conscious of how tuition costs have increased over time and recognize that Gateway's personalized and responsive educational experience is not always accessible to those who need all that we offer. In order to ensure that Gateway's transformative program is available to both current and prospective families, we will continue to advance our funding model to drive financial strength and discipline.

Objectives

01 Financial Aid

We will continue to increase access and affordability by setting annual goals for financial aid. We will also educate and support families through the process of funding a specialized education.

02 Marketing

We will develop and fund marketing programs and resources to meet our Lower and Middle School enrollment goals and enable more students to thrive in Gateway's transformative program.

03 Giving

We will continue to evolve and articulate a clear case that engages and inspires our community to further develop a culture of philanthropy and volunteerism. We will also further our advancement initiatives by gaining access to other funding sources.

Goal 4

Funding the Difference
